collaboration

PANACAST 40 VBS & PANACAST 50 VBS

Make every space a productive meeting place with the only Android video bars that capture the entire room.

The only Android video bars that capture the entire room

Being seen doubles active involvement in meetings. Yet only 15% of meeting rooms are video-call-ready. That's a big opportunity.

Help your customers get more from their meeting spaces with PanaCast Android video bar solutions.

A unique 180° field-of-view captures the entire room in pin-sharp precision, so everyone is seen, heard, and included.

With AI-powered video features and impressive audio, Jabra transforms your customers' meeting rooms into truly professional collaborative spaces.

And now, with options for both small and medium meeting spaces, you can meet more of your customers' needs for more of their meeting rooms.

WHY ANDROID?

PanaCast video bar solutions run natively on Android straight out of the box.

That means:

- + Faster set-up**
Less hassle, fewer cables, no IT headaches
- + Smoother user experience**
Teams, Zoom, and BYOD options
- + Easier sales**
Plug-and-play simplicity for quick deployments

The bottom line? Less hassle, more productive meetings.

Overview

**SMALL
ROOMS**
Ideal up to 6
people

PANACAST 40 VBS

Testimonials & use cases

PANACAST 40 VBS

7

[Watch Mehryn Corrigan, Sr. Solutions Specialist from Microsoft, present the new Express Install for Teams Rooms.](#)

“Express Install for Microsoft Teams Rooms”

Microsoft’s latest room archetype is designed for one of the most common conference room sizes – Jabra PanaCast 40 VBS fits perfectly thanks to:

- Lower cost
- Simpler and faster deployment
- Increased flexibility

[Watch Hardy Soni, Internal Architecture Solutions at Accenture, talk about how Jabra’s portfolio is helping his company shape the digital workplace of the future.](#)

Accenture is redefining the meeting room experience across huddle spaces and large rooms with a focus on all-in-one solutions that simplify collaboration. The key PanaCast 40 VBS features that stood out for them – particularly for small rooms and mobile set-ups – are:

- 180° Camera Technology – perfect for huddle spaces, ensuring everyone in the room is seen
- Simplicity meets innovation – feature-rich yet easy-to-use devices for all room sizes, as well as touchscreen boards

Testimonials & use cases

PANACAST 50 VBS CASE STUDY

Originally, Incubate Fund Co. used a speakerphone with a built-in 360° camera from another company, but sound and image quality fell short. Mr. Niitsu, the company's office manager, comments:

“ With the previous system, you have to bring the PC to the conference room and connect it to the speakerphone, so it took 3~5 minutes to start each meeting, which is a huge waste of time. In addition, the system struggled to pick up everyone's voice which often adversely affected communication.”

After relocating office, they switched to PanaCast 50 VBS and Mr. Ohno, the distributor of Eizo System Co. Ltd., comments:

“ In the new office layout, there were many conference rooms with the conference table located close to the wall. In such a layout, it is difficult to show everyone on the camera. However, the PanaCast 50 VBS has a 180° angle of view which addresses this challenge. The new office also has a state-of-the-art design so the solution also needed to be stylish. The PanaCast 50 Video Bar System has a simple design and space-saving integrated camera, speaker, and microphone. There is less wiring and no clutter on the tabletop, so all round it was the perfect choice.”

Mr. Niitsu, Office Manager, IncubateFund:

- “ In a limited space, the 180-degree camera captures everyone's image beautifully. We also like that the system automatically adjusts the view according to the number of people and can also identify and zoom in on the speaker are also wonderful. The design is also impeccable as we really like not seeing wires everywhere.”
- “ It's shockingly fast to start a meeting. Just press one button – it takes under 10 seconds. There's no more wasted time at the start of each meeting.”
- “ I was surprised how well the microphones performed. The system picks up everyone's voice, even when multiple people talk at the same time.”
- “ The PanaCast 50 VBS makes our meetings even more dynamic with the Zoom Smart Gallery feature.”
- “ The new features coming with firmware updates really underpins our decision to choose Jabra. As a company, we partner and support our clientele's growth, and likewise with Jabra, the PanaCast 50 VBS technology is continuing to evolve and further delight us even once it's been installed.”
