- Use with a Jabra headset or speakerphone for an outstanding audio experience
- Truly plug-and-play. Works seamlessly with all leading UC platforms

*Based on GN internal UX testing, March 2025.

ENGAGE AI

Outstanding customer experience, empowered by tone AI

Then you'll love our latest innovation: Engage AI. It's a new kind of sentiment analysis software that helps contact center agents enhance and improve the customer experience, empowered by artificial intelligence, and working in harmony with your preferred contact center platform.

INCREASE CUSTOMER SATISFACTION IN REAL TIME

Engage AI analyzes customers' and agents' tone of voice in real time to understand the sentiments running through both sides of the conversation. This helps them adjust and improve their tone of voice to give customers an even better experience. It works because positive agents are more engaged, so customers end calls feeling happy they've been heard and helped.

DEVELOP AND RETAIN EMPOWERED AGENTS

We all need friends we can rely on. Engage AI is like a personal coach, standing in your agents' corner and giving them a pep talk when they need one. So they can confidently get on with their calls, knowing Engage AI has got their back. A personalized interface and customizable avatars add an element of fun, with pop-up notifications letting them know when they're doing a great job, and live tips and tricks helping them up their game in real time.

GIVE SUPERVISORS ACCESS TO ACTIONABLE INSIGHTS

It's not all about the agents – Engage AI has plenty for supervisors to love too. Training, coaching, and bringing new agents up to speed couldn't be easier, with easy call filtering and improved options for team management and mass deployment – both at an individual and team level. Visual dashboards show how individual agents are doing on their customer satisfaction scores, as well as trends for the whole team. Engage AI makes it easy for you to offer more constructive, individualized coaching, just where and when it's needed.

COMPATIBLE WITH YOUR PLATFORMS

Whatever contact center platform you're using, Engage AI is the ultimate partner. It works alongside most platforms and is ideally paired with Jabra Engage headsets, which enable additional features such as measuring background noise, but works well with all professional headsets. Very little configuration is required, and before you know it, your agents will be understanding your customers' moods faster than you can say "let me look into that for you." And if you prefer a single pane of glass view, you can also integrate Engage AI with your own systems and tools using APIs.

WHY CHOOSE ENGAGE AI?

Because tone is the best predictor of emotion, we've trained our AI to understand human tone of voice. It only took 20 years of research by the top professors and engineers in voice emotion tech, over 6,000 human voice parameters, millions of analyzed conversations, and who knows how many email threads with the word 'algorithm' in them. This software breakthrough is, in our opinion, the best solution available for measuring customer satisfaction. But making the ultra-complicated ultra-simple is what we do, so all this knowledge and data is packaged in an amazingly intuitive and engaging interface. With easy-to-read, color-coded graphs, personalized avatars, and live tips and tricks to help agents up their game.

JABRA+

Remote device management, made easy

Monitor and manage the full range of audio and video conferencing room solutions from anywhere with powerful features like real-time room visibility, simple troubleshooting, remote reboot*, and mass updates to enable new experiences. With simple and secure device management, you can optimize the performance of all your Jabra devices from anywhere to keep your meetings running smoothly.

ALL-IN-ONE REMOTE DEVICE MANAGEMENT

Keep your Jabra video conferencing and personal audio devices running smoothly from wherever you are in the world. Quickly handle any issues and keep your tech meeting-ready without the hassle.

FULLY SCALABLE

Whether you’ve got a few devices or lots, Jabra+ handles them all. View and manage all audio and video conferencing room solutions globally or by location and tailor IT access to fit your needs, all with one simple tool.

CUSTOMIZE YOUR DEVICE SETUP

Organize your setup to view devices by location, group, or individual device, with an easy-to-use draganddrop interface. Get instant access to the information you need quickly and clearly.

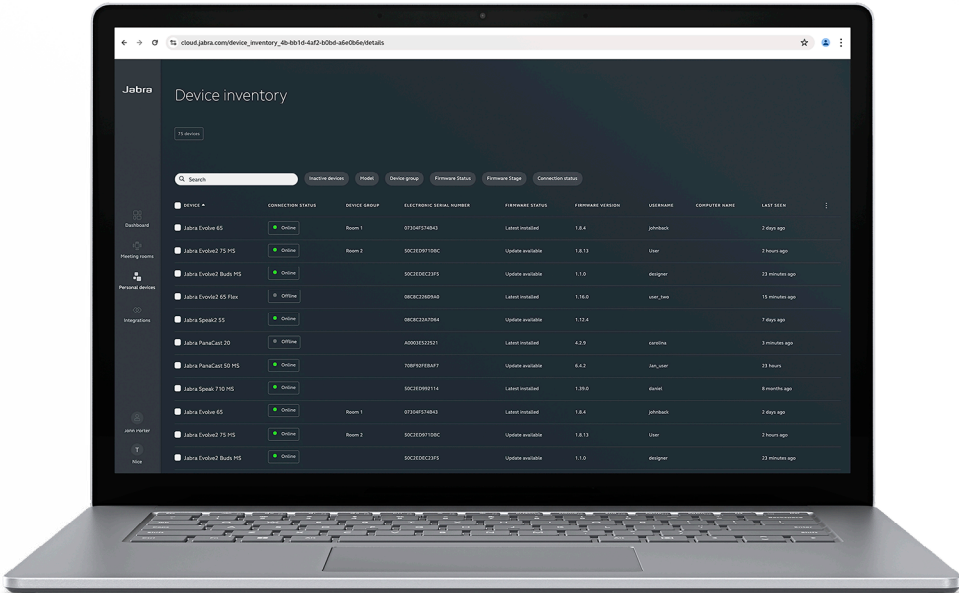

EASY FIRMWARE UPDATES

Update your devices with the latest experiences to get the most from your investment. Automatically update every device or test updates in specific device groups. Updates can be scheduled after-hours to avoid disruption and are automatically rescheduled if a room or audio device is in use.

HIGHLY SECURE

Built on Microsoft Azure, Jabra+ is secure and scalable with easy access through single sign-on integrations. It meets GDPR standards and undergoes frequent security assessments to ensure robust protection and compliance.

* Applicable to video conferencing room solutions only.
